

Chemical resistance glove with industry-leading grip and superior dexterity

- AlphaTec® 58-270 is a liquid-proof glove designed for light to medium chemical applications
- AlphaTec® 58-270 benefits from the industry-leading grip with an enhanced dexterity and comfort
- The thin, double-wall nitrile shell and 15-gauge seamless nylon liner offer users excellent tactility and flexibility. In addition, the glove's lightness results in better comfort than any other chemical resistant glove

Industries

- Automotive
- Automotive Aftermarket
- Machinery and Equipment
- Metal fabrication
- Chemical

Applications

- Body painting including surface inspection
- Applying sealers, touching up
- Press injection molding
- Equipment repair & maintenance
- Assembling and mounting components
- Painting or cleaning tools or robots
- Final assembly
- Metalwork, glass processing
- Assembly & inspection of components
- Warehousing of raw materials
- Testing

Key Features

- AlphaTec® 58-270 provides the best grip thanks to the ANSELL GRIP™ technology.
- Easy to don and remove, the glove retains minimal heat, reduces perspiration compared to other chemical gloves resulting also in reduced hands fatigue.
- Workers keep their hands clean and their skin protected from harmful contact with oils, chemicals and various liquids due to the thin double-wall Nitrile shell and 15-gauge seamless nylon liner.
- The safety cuff shape is designed to ensure easy donning and removal, preventing snagging and avoiding itching on bare hands.
- The nylon liner inside retains minimal heat, resulting in reduced perspiration.
